

## **FAMAG-Exclusive in Germany: ProFit® Hole Saw System**

As a novelty FAMAG Werkzeugfabrik presents the hole saw system Drill & Drop of ProFit®, the most innovating product of the ProFit-range. a smart constructed shank for hole saws which is axial movable, so that the time-consuming removing of the drill core can be omitted. Correspondent to the Drill & Drop, we deliver bi-metal hole saws and the carbide tipped hole saws Multi Purpose.

### **Problems of all professionals:**

In practice the plug gets stuck in the hole saw and has to be removed. This removal is very time-consuming and sometimes it is extremely difficult to manage.

### **The solution: Hole saw shank system Drill & Drop**

As a novelty FAMAG Werkzeugfabrik now presents the shank system Drill & Drop. It consists of a smart constructed shank for hole saws which is designed axial movable. When you finished the boring and the drill core got stuck in the hole saw, you just push a button on the shank and pull the hole saw easily to the boring socket. The rest of the material slides out of the hand.

The time saving is enormous, because the difficult removing (especially from hot materials) is omitted and you have taken away the drill core in the twinkle of an eye!

### **BI-metal hole saws series 2172**

In combination with the Drop & Drill shank system, we deliver the bi-metal hole saw for borings in metal. Available are more than 60 different diameters from 14mm to 210mm.

### **Multi purpose hole saws carbide tipped**

With the carbide tipped multi purpose hole saws you work up to 5 times faster than with an usual carbide tipped hole saw! Hereby you save time and costs. By the use of the high class carbide tipping it is possible to saw in all kinds of wood, chip tray, MDF, plastics, tiles, concrete and stone. Because of the hole saw possibility to move on the shank, angle borings can be made. Besides the above mentioned 70 single sizes from 16mm to 210mm (almost increasing in mm steps) we also offer an edge countersink for counterbore caps of flush boxes in masonry. Of course all products are available separately but there are also attractive sets in PVC boxes and in aluminium cases available.

Please find details on prices and sets on our website soon.
